How To Generate SonarQube Authentication Token APi For Jenkins-DecodingDevOps
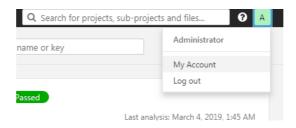

How To Generate SonarQube Authentication Token APi For Jenkins

In the following steps i will show how to generate sonarqube Authentication token api for jenkins. if you use sonarqube Authentication Token then no need to use credentials like username and password to invoke sonar analysis on any projects. with the help this sonarqube api token we can invoke sonar analysis from remote. use this sonarqube token api to integrate with different tools like jenkins, rundeck, gitlab.
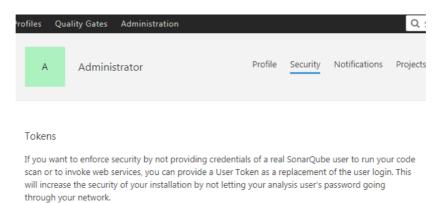

Generate SonarQube Authentication Token Api

After login to sonarqube go to my account

click on my account Here you can see profile,security,notifications,projects

enter any name for your token and click on generate

it will generate sonarqube api token

Name	Created	
mytoken	March 17, 2019	Revoke

Generate New Token: [Enter Token Name] [Generate]

New token "mytoken" has been created. Make sure you copy it now, you won't be able to see it again!

[Copy]   fda77f3a8f4d2223a731d041691c786c131087e3

How To Use SonarQube Api Token or User Token

in sonar properties we can use this token to invoke sonar analysis on any project. so we no need to pass username and password

in sonar properties there is one property called **sonar.login**, the value of sonar.login is our newly generated api token
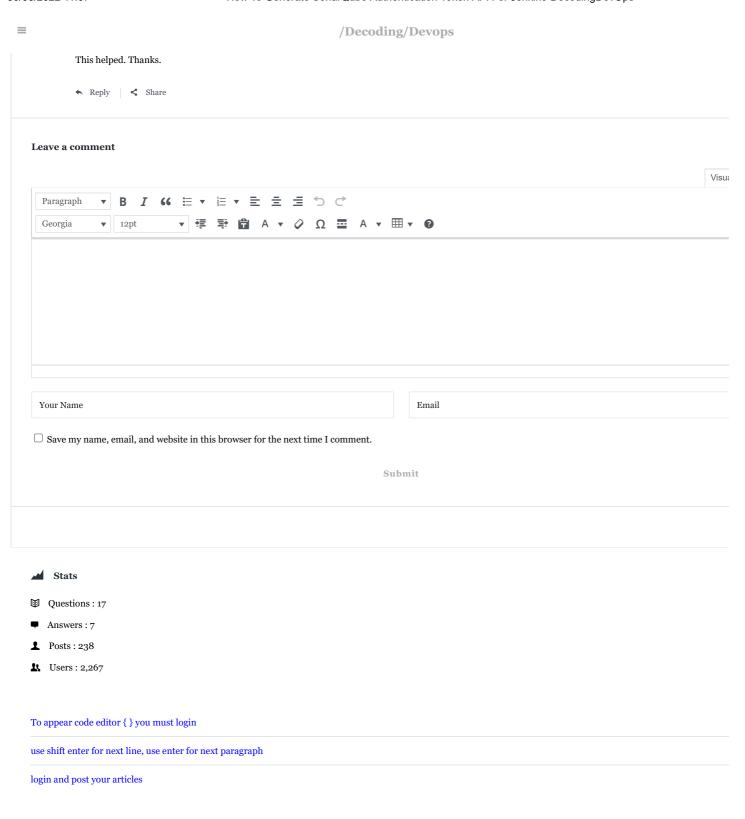

sonar.login=4krwnfehrnkwejohro2ienwrpwereh89r3h.

you can also use this sonarqube token api for jenkins for sonar analysis.
